

# interChange Provider Important Message

## **Attention: Ambulatory Surgical Centers**

DXC Technology has identified a claims processing issue regarding services rendered in an Ambulatory Surgical Center setting. Ambulatory Surgical Centers are now required to bill using a performing provider, as a result claims submitted for processing could deny as a duplicate against the physician claim, if the physician claim is submitted first. DXC Technology is currently reviewing this issue and once an update is available a follow up important message will be published and sent to Ambulatory Surgical Center Providers.
