Outpatient Prospective Payment System and Inpatient Only Procedures

Attention: Outpatient Hospitals

The Department of Social Services (DSS) has become aware that there may be some procedures on CMAP's Addendum B that is designated as an inpatient only procedure, for which the hospital has previously performed in the outpatient hospital setting. The Department is requesting that hospitals review CMAP's Addendum B; particularly those codes assigned a status indicator of "C" - *Inpatient only procedure, procedure not paid under OPPS*. If the hospitals believe there are any procedures that should be reviewed by the Department to be eligible for reimbursement in an outpatient hospital setting, please send the list of procedure codes and a brief justification as to why the service can be performed in an outpatient setting to ctxihospipay@hpe.com.
