

Important Message

Electronic Health Records Incentive Program: Please Register for the Public Health Immunization Registry on or Before December 31, 2016

This message **ONLY** applies to eligible professionals who meet **ALL** of the following criteria:

1. Providers attesting to Meaningful Use (MU) in Program Year 2016
2. Providers who administer routine immunizations to patients 0-6 years old

To successfully achieve MU for Program Year 2016, eligible professionals must meet certain objectives, including the Public Health Reporting Objective (objective #10). In order to meet this objective, eligible professionals must meet two of the total number of measures available to them by demonstrating that they are in active engagement with a public health agency to submit electronic public health data from their CEHRT.

One available option is Immunization Registry Reporting. **Eligible professionals must be registered with the Department of Public Health Immunization Registry on or before December 31, 2016 to meet this measure for Program Year 2016. Providers have until 11:59 PM on December 31, 2016 to complete their registration.**

Providers may register through the MUST Portal on the [DPH website](#).
