### **Electronic Health Records Incentive Program: Specialized Registry**

This message only applies to Eligible Professionals (EP) and Eligible Hospitals (EH) that are attesting to the CT Medicaid EHR Incentive Program.

The Center for Medicare and Medicaid Services (CMS) has created a [centralized repository](#) for public health agency and clinical data registry reporting. This repository can help eligible professionals and eligible hospitals determine if there is an applicable specialized registry that they can report to in order to meet the Specialized Registry measure of the Public Health objective in Meaningful Use.

This is not an exhaustive list, and absence of an applicable specialized registry on this list is not enough documentation to exclude from the measure. Providers should still check with jurisdictional public health agencies or specialty societies to which they belong.
