## Electronic Visit Verification ABN Training Invitation

Sandata Technologies has modified their Santrax system to automate the application of Advanced Beneficiary Notice (ABN) data to the electronic claims submitted to DXC Technology. This enhancement has reduced the level of effort necessary to enter ABN data for clients who have Medicare coverage. As a result, effective July 1, 2017, Home Health service providers who are mandated to use Electronic Visit Verification (EVV) for their Personal Care Assistant (PCA), Acquired Brain Injury (ABI) or Connecticut Home Care (CHC) waiver clients will have to enter the appropriate Medicare denial/ABN information into the Santrax system prior to exporting claims. Training for the new ABN feature in the Santrax system will take place June 7 and June 8, 2017. Providers may register for at least one of the sessions below to learn how to use the new process.

Please Note: There is a limit of registrants to two employees per agency.

Please register as soon as possible to secure a reserved seat for the session. There are a limited number of available seats and registration is expected to fill up quickly.

<u>Date</u>	<u>Time</u>	<u>Registration Link</u>
Wednesday, June 7, 2017	2-4 PM	<a href="https://goo.gl/Clihdg">https://goo.gl/Clihdg</a>
Thursday, June 8, 2017	11AM - 1 pm	<a href="https://goo.gl/vwMaeL">https://goo.gl/vwMaeL</a>

For additional information about the ABN requirement in EVV please see bulletin 2017-31 - Update to ABN Instructions for the EVV Santrax System.
