Attention Inpatient Hospital Providers – DRG Calculator – Updated 1/11/22

A revised version of the Diagnosis Related Group (DRG) Calculator has been posted. It was previously updated to reflect the DRG Weights, Average Length of Stays (ALOS) and Outlier Thresholds effective for discharge dates January 1, 2022 and forward. The Department of Social Services (DSS) had also updated the hospital rates for discharge dates January 1, 2022 and forward. The hospital's Adjusted Base Rate, IME Factor and Cost-to-Charge ratio are located under the Provider Table CT tab in the DRG Calculator. However, the Cost-to-Charge ratios that were previously posted were incorrect. In addition, the hospital's Behavioral Health and Rehab per diem rates have been updated for dates of service January 1, 2022 and forward. The revised version of the DRG calculator has been added to the Hospital Modernization Web Page. We apologize for the inconvenience. Gainwell Technologies has determined there were no inpatient claims that processed with the incorrect payment for discharge dates January 1, 2022 and forward.
