RE: Correction to the Home Health Fee Schedule

The HCPCS code and modifier combination of S9124-TG was included on the home health fee schedule in error. This procedure code/modifier combination is not reimbursable and will deny if billed. The corrected home health fee schedule is now posted to the CMAP Web site: www.ctdssmap.com

Providers should continue to review the following two bulletins for billing guidance related to Home Health Pediatric Complex/High Tech Level of Care: [PB 22-02](#) *Updating the Reimbursement Rate for Nursing Services for Home Health Pediatric Complex/High Tech Level of Care* and [PB 22-40](#) *Updating the Reimbursement Rate for Nursing Services for Home Health Pediatric Complex/High Tech Level of Care, Effective July 1, 2021-July 31, 2021*
