

interChange Provider Important Message

Attention: Home Health Providers

Sandata Agency Management System Update to Medication Administration Visits less than Eight (8) Minutes

The purpose of this Important Message is to notify home health providers about an update that allows Medication Administration visits less than 8 minutes to be confirmed and billed out of the State's Electronic Visit Verification (EVV) system, i.e., Sandata Agency Management. The impacted procedure codes are:

- T1502 ("Medication admin visit")
- T1502 with TT modifier ("Individualized service for more than one patient")
- T1503 ("Med admin, not oral/inject")
- T1503 with TT modifier
- H0033 ("Oral med adm direct observe")
- H0033 with TT modifier

Previously, if a Medication Administration visit was less than 8 minutes, the visit would set the exception of "No Time Calculated" and remain in a "Not OK to Bill" status. This issue has been addressed and providers may now bill for Medication Administration services that are less than 8 minutes.

If you have any questions or comments, please contact the EVV mailbox at ctevv@gainwelltechnologies.com.
