Diagnosis Related Grouper (DRG) Update

The Diagnosis Related Grouper (DRG) was implemented on April 30, 2025. Claims submitted on 4/30/25 with DOS 4/1/25 and after will use the new version of the grouper. Although this is a new version of the grouper, there are no changes to DRG rates or weights.

Quarterly ICD-10 updates were made effective for April 1st. There were 50 ICD-10 surgical codes added and 5 discontinued. New codes will now be recognized with the new diagnosis grouper installed.
