Attention: Inpatient Hospital Providers Updated 08/12/2016

Inpatient delivery stays denying due to lack of prior authorization when the delivery stays do not require prior authorization.

The Department of Social Services' (DSS) criterion for identifying a delivery for an inpatient stay is based on the primary diagnosis code on the claim. If the primary reason for the stay was a delivery, then Prior Authorization (PA) is not required. DSS has determined that there were ICD-10 diagnosis codes that should have bypassed the PA requirement on an inpatient delivery stay.

On 8/12/2016 there was an additional system update to allow the following diagnosis codes to be billed as the primary diagnosis which will bypass PA on a delivery inpatient stay: 0009.523, 024.419, 036.8930, 045.8X2, and 099.02.

If the hospital still believes there are other diagnoses that should be considered to bypass PA when a delivery occurs, please send claim examples (including ICN) to Hewlett Packard Enterprise at the following e-mail address: ctxixhosppay@hpe.com.
