RE: New Clinical Guidelines – Prior Authorization (PA) Electric Tumor Treatment Field Therapy

Effective November 1, 2017, new clinical guidelines will be used in conjunction with the Department of Social Services (DSS) definition of medical necessity to render determinations on prior authorization (PA) requests for electric tumor treatment field therapy.

The new policy is available on the HUSKY Health Web site at: www.ct.gov/husky. To access the policy, click on *For Providers* followed by *Policies*, and then *Procedures and Guidelines* under the *Medical Management* menu item.

NOTE: The criteria are guidelines only. Should the criteria ever conflict with the DSS definition of medical necessity, the definition of medical necessity in section 17b-259b of the Connecticut General Statutes shall prevail.

Providers must submit clinical information supporting the medical necessity of the requested service or item. PA requests submitted without sufficient clinical information to support the decision-making process will be held in a pended status until all required information is received by Community Health Network of Connecticut, Inc. (CHNCT). PA requests that pend for twenty (20) business days without receipt of all required documentation are subject to denial.

Prior Authorization Submission Process

There are no changes to the PA submission process. Providers may continue to fax the completed Outpatient PA Request Form or submit the request via the medical prior authorization Web portal.
