Revised 2016 Medicare Physician Fee Schedule (MPFS)

The 2016 MPFS has been pulled down from the NGS website and is currently being reviewed by the Centers for Medicare & Medicaid Services (CMS) in order to make technical corrections that will align the 2016 relative value units (RVU) with the policies published in the CY 2016 MPFS Final Rule. Please note that the Department used the initial version of the 2016 MPFS, posted in November 2015, to calculate the rates payable under the Connecticut Medical Assistance Program (CMAP) for codes added for 2016. Once the revised 2016 MPFS has been published the Department will review it and revise the Medicaid rates for any of the new codes added for 2016 that are impacted by the changes made by CMS. HP will automatically adjust previously paid claims and providers will not need to resubmit. The Department will publish another IM to notify providers of the fee schedules that are revised.
