Attention Home and Community-Based Waiver Providers and Access Agencies: Rate Methodology and Cost Survey

The Department of Social Services (DSS) is reviewing its current methodology for Home and Community Based 1915c waiver program services. DSS has contracted with Myers and Stauffer LLC, CPAs, to conduct this study. As part of the study, we will ask providers to submit cost surveys. Providers who bill for waiver services will be asked to submit data to provide accurate program and administrative cost information for the development of the rate methodology. The Myers and Stauffer team is developing a cost survey using previous tools they have used in other states, customized to fit the Connecticut environment. Myers and Stauffer will also provide training regarding completion of the cost surveys and ongoing support to providers as needed. We will send information regarding training, including date(s) and time, at a later date.
