Physician Assistants, and Outpatient Hospitals**

**RE: Removal of Prior Authorization for Procedure Codes 81420 and 81507**

Effective for dates of service September 1, 2020 and forward, the Department of Social Services (DSS) is removing Prior Authorization (PA) on the following two procedure codes commonly used to bill for noninvasive prenatal testing/screening that are listed on the Independent Laboratory fee schedule and on the Connecticut Medical Assistance Program (CMAP) Addendum B.

- **81420** – Fetal chromosomal aneuploidy; and
- **81507** – Fetal aneuploidy trisomy risk

Procedure codes 81420 and 81507 will be eligible for reimbursement without PA for all HUSKY Health members (HUSKY A, B, C and D). As with all laboratory services, all services submitted for reimbursement must be medically necessary, ordered by a CMAP enrolled licensed practitioner and performed by a CMAP enrolled laboratory provider.

Providers must continue to refer to the Independent Laboratory fee schedule for PA requirements.
