**RE: 1. July 2021 Quarterly HIPAA Compliant Update – Medical Clinic Fee Schedule**  
**2. Adding Vaccines to the Medical Clinic Fee Schedule**

**Quarterly HIPAA Compliant Update**

Effective for dates of service July 1, 2021 and forward, the Department of Social Services (DSS) is incorporating the July quarterly updates of the 2021 Healthcare Common Procedure Coding System (HCPCS) changes (additions, deletions and description changes) to the medical clinic fee schedule.

DSS is making these changes to ensure that the Clinic – Medical fee schedule remains compliant with the Health Insurance Portability and Accountability Act (HIPAA). The changes apply to services reimbursed under the HUSKY Health programs (A, B, C, and D).

**Adding Vaccines**

Effective for dates of service July 1, 2021 and forward, the following procedure codes will be added to the Medical Clinic fee schedule.

| Code  | Description                  |
|-------|------------------------------|
| 90619 | Menacwy-tt vaccine im        |
| 90697 | Dtap-ipv-hib-hepb vaccine im |

Procedure codes 90619 and 90697 will be priced based on the National Drug Code (NDC) when the vaccines are provided to patients that are not eligible under the Connecticut Vaccine Program (CVP) that is administered through the Department of Public Health (DPH). When procedure codes 90619 and 90697 are administered to a HUSKY Health member that is eligible under the CVP, the detail for 90619 and 90697 will

deny since DPH provides the vaccine product free of charge. Providers must include the standard 11-digit NDC on all claims billing this physician-administered drug to avoid being denied or reimbursed incorrectly. Providers should review Provider Bulletin, PB [2016-22](#) “New National Drug Code Requirements for Manually Priced Vaccines and Toxoids” for additional guidance. For more information on the CVP, please refer to: <https://portal.ct.gov/DPH/Immunizations/CVP---Information-for-Providers>
