RE: January 2026 Updates to the CMAP Telehealth Table – Subsequent Hospital Care and Nursing Facility Care

Effective for dates of service January 1, 2026 and forward, the Connecticut Medical Assistance Program (CMAP) is end dating the telehealth frequency limits on subsequent inpatient and nursing facility visits. These changes apply to services reimbursed under the HUSKY Health programs (A, B, C, and D).

Effective for dates of service January 1, 2026 and forward, the limits on the following services/procedure codes are being removed:

Procedure Codes	Description	Service Limit end dated
99231		
99232	Subsequent Hospital Care	One telehealth visit every three days
99233		
99307		
99308	Subsequent Nursing Facility Care	One telehealth visit every 14 days
99309		
99310		

As a reminder, although the above limitations are being end dated as of January 1, 2026 and forward, it is the Department of Social Services' expectation that enrolled CMAP providers will perform clinically appropriate services including, but not limited to, ensuring timely access to in-person services when clinically indicated, medically necessary, or requested by the HUSKY Health member for optimum quality of care.

Additionally, providers must continue to follow the Telehealth guidance and policies, including but not limited to, in-state presence for enrollment purposes, location of providers for delivery of telehealth services, HIPAA and privacy and confidentiality requirements as outlined and specified by [PB 2023-38](#) REVISED Guidance for Services Rendered via Telehealth.
