

Provider Enrollment/Re-enrollment/Add Alternate Service Location Address Application Criteria

The purpose of this document is to outline the following:

- 1) Whether providers are required to enroll/re-enroll via the Web portal
- 2) Additional follow-on documentation that providers must submit in order to complete their provider enrollment/re-enrollment/add alternate service location address application, if applicable
- 3) Re-enrollment periods for each provider type/specialty
- 4) License requirements for each type/specialty, with additional instructions below:
 - **In-state Providers:** Licensed through Connecticut's Department of Public Health (DPH) – If a provider type/specialty is licensed through DPH, in order to enroll/re-enroll/add alternate service location address with that type/specialty, the provider's license must be active and must be a license type indicated in the "DPH License Type" column below. A blank in the DPH License Type column indicates that either the provider type/specialty is licensed through another State Agency, such as the Department of Children and Families (DCF), or that there are no license requirements for that type/specialty.
 - For definitions of the DPH license types found in the last column or the tables below, reference [APPENDIX A – License Type Definitions](#).
 - **Out-of-state Providers:** Out-of-state providers must provide a hard copy of their license that contains their license number, license effective date, and license end date. Between a provider's enrollment/re-enrollment period, if an out-of-state provider's license is nearing its expiration date, providers will be required to submit updated license information in order to remain actively enrolled in the Connecticut Medical Assistance Program.
