

PROVIDER POLICIES & PROCEDURES

LUXTURNA™ (VORETIGENE NEPARVOVEC-RZYL)

The primary purpose of this document is to assist providers enrolled in the Connecticut Medical Assistance Program (CMAP) with the information needed to support a medical necessity determination for Luxturna. By clarifying the information needed for prior authorization of services, HUSKY Health hopes to facilitate timely review of requests so that individuals obtain the medically necessary care they need as quickly as possible.

Luxturna is an adeno-associated virus vector-based gene therapy indicated for the treatment of children and adults with confirmed biallelic RPE65 mutation-associated retinal dystrophy, an inherited form of vision loss that may result in blindness. Individuals must have viable retinal cells as determined by the treating physician.

Hereditary retinal dystrophies are associated with progressive visual dysfunction and are caused by genetic mutations. Biallelic mutation carriers have a mutation in both copies of a particular gene (a paternal and a maternal mutation). The RPE65 gene provides instructions for making an enzyme that is essential for normal vision. Mutations in the RPE65 gene lead to reduced or absent levels of RPE65 activity, blocking the visual cycle and resulting in impaired vision. Individuals with biallelic RPE65 mutation-associated retinal dystrophy experience deterioration of vision over time. This loss of vision, often during childhood or adolescence, ultimately leads to complete blindness.

Luxturna delivers a normal copy of the RPE65 gene directly to retinal cells. These retinal cells then produce the normal protein that converts light to an electrical signal in the retina to restore the individual's vision loss. Luxturna uses a naturally occurring adeno-associated virus, which has been modified using recombinant DNA techniques, as a vehicle to deliver the normal human RPE65 gene to the retinal cells to restore vision.

CLINICAL GUIDELINE

Coverage decisions for the use of Luxturna will be made in accordance with the DSS definition of Medical Necessity. The following criteria are guidelines only. Coverage decisions are based on an assessment of the individual and their unique clinical needs. If the guidelines conflict with the definition of Medical Necessity, the definition of Medical Necessity shall prevail. The guidelines are as follows:

- I. Luxturna will be considered medically necessary based on the FDA approved indication of confirmed biallelic RPE65 mutation-associated retinal dystrophy when ALL of the following criteria are met:
 - A. The individual has a diagnosis, confirmed by genetic testing, of biallelic RPE65 mutation-associated retinal dystrophy
AND
 - B. The individual has viable retinal cells as determined by the treating physician
AND
 - C. The individual is \geq 12 months of age (Safety and efficacy has not been established in individuals under 12 months of age)

Please note that authorization is based on medical necessity at the time the authorization is issued and is not a guarantee of payment. Payment is based on the individual having active coverage, benefits and policies in effect at the time of service.

To determine if a service or procedure requires prior authorization, CMAP Providers may refer to the Benefit Grid summaries on www.ct.gov/husky by clicking on *For Providers* followed by *Benefit Grids* under the *Medical Management* sub-menu. For a definitive list of benefits and service limitations, CMAP providers may access the CMAP provider fee schedules and regulations at www.ctdssmap.com.

AND

- D. The individual is < 65 years of age (Safety and efficacy has not been established in individuals 65 years of age and older)

AND

- E. Dose administered will be 1.5×10^{11} vector genomes per eye

AND

- F. Luxturna will be administered via subretinal injection to each eye on separate days within a close interval but no fewer than 6 days apart

AND

- G. The injection will not be administered in the immediate vicinity of the fovea

AND

- H. The individual will receive systemic oral corticosteroids following FDA recommendations

AND

- I. The prescriber agrees to monitor the individual for signs of infection, visual disturbances, retinal abnormalities and increased intraocular pressure post injection

AND

- J. The prescriber agrees to instruct the individual to avoid air travel, travel to high elevations and scuba diving until the air bubble formed following administration of Luxturna has completely dissipated from the eye.

Note: The prescriber must verify dissipation of the air bubble through ophthalmic examination

- II. Luxturna is typically considered investigational and therefore not medically necessary for all other indications. Again, however, if an individual does not meet these criteria, an assessment of the individual's unique clinical needs will also be conducted.

NOTE: EPSDT Special Provision

Early and Periodic Screening, Diagnosis, and Treatment (EPSDT) is a federal Medicaid requirement that requires the Connecticut Medical Assistance Program (CMAP) to cover services, products, or procedures for Medicaid enrollees under 21 years of age where the service or good is medically necessary health care to correct or ameliorate a defect, physical or mental illness, or a condition identified through a screening examination. The applicable definition of medical necessity is set forth in Conn. Gen. Stat. Section 17b-259b (2011) [ref. CMAP Provider Bulletin PB 2011-36].

PROCEDURE

Prior authorization of Luxturna is required. Coverage determinations will be based upon a review of requested and/or submitted case-specific information.

The following information is needed to review requests for Luxturna:

1. Fully completed State of Connecticut, Department of Social Services HUSKY Health Program Luxturna Prior Authorization Request form (to include physician's order and signature);
2. Genetic testing results;
3. Clinical information supporting the medical necessity of the treatment as outlined above; and
4. Other information as requested.

Requesting Authorization

Requests for the prior authorization of Luxturna must be submitted by the ordering physician and faxed to the number listed on the request form. Questions regarding this form should be directed to the HUSKY

Please note that authorization is based on medical necessity at the time the authorization is issued and is not a guarantee of payment. Payment is based on the individual having active coverage, benefits and policies in effect at the time of service.

To determine if a service or procedure requires prior authorization, CMAP Providers may refer to the Benefit Grid summaries on www.ct.gov/husky by clicking on *For Providers* followed by *Benefit Grids* under the *Medical Management* sub-menu. For a definitive list of benefits and service limitations, CMAP providers may access the CMAP provider fee schedules and regulations at www.ctdssmap.com.

Health Program Utilization Management Department at 1.800.440.5071 (select option for medical authorizations).

Initial Authorization

If approved, authorization will be given for 1 dose per eye

Reauthorization

Not applicable

EFFECTIVE DATE

This Policy for the prior authorization of Luxturna for individuals covered under the HUSKY Health Program is effective April 1, 2018.

LIMITATIONS

One time dose each eye per lifetime

CODES:

Code	Definition
J3590	Unclassified biologics
C9399*	Unclassified drugs or biologicals

*Use for outpatient hospital billing only

DEFINITIONS

1. **HUSKY A:** Connecticut children and their parents or a relative caregiver; and pregnant women may qualify for HUSKY A (also known as Medicaid). Income limits apply.
2. **HUSKY B:** Uninsured children under the age of 19 in higher income households may be eligible for HUSKY B (also known as the Children’s Health Insurance Program) depending on their family income level. Family cost-sharing may apply.
3. **HUSKY C:** Connecticut residents who are age 65 or older or residents who are ages 18-64 and who are blind, or have another disability, may qualify for Medicaid coverage under HUSKY C (this includes Medicaid for Employees with Disabilities (MED-Connect), if working). Income and asset limits apply.
4. **HUSKY D:** Connecticut residents who are ages 19-64 without dependent children and who: (1) do not qualify for HUSKY A; (2) do not receive Medicare; and (3) are not pregnant, may qualify for HUSKY D (also known as Medicaid for the Lowest-Income populations).
5. **HUSKY Health Program:** The HUSKY A, HUSKY B, HUSKY C, HUSKY D and HUSKY Limited Benefit programs, collectively.
6. **HUSKY Limited Benefit Program or HUSKY, LBP:** Connecticut’s implementation of limited health insurance coverage under Medicaid for individuals with tuberculosis or for family planning purposes and such coverage is substantially less than the full Medicaid coverage.
7. **Medically Necessary or Medical Necessity:** (as defined in Connecticut General Statutes § 17b-259b) Those health services required to prevent, identify, diagnose, treat, rehabilitate or ameliorate an individual's medical condition, including mental illness, or its effects, in order to attain or maintain the individual's achievable health and independent functioning provided such services are: (1) Consistent with generally-accepted standards of medical practice that are defined as standards that

Please note that authorization is based on medical necessity at the time the authorization is issued and is not a guarantee of payment. Payment is based on the individual having active coverage, benefits and policies in effect at the time of service.

To determine if a service or procedure requires prior authorization, CMAP Providers may refer to the Benefit Grid summaries on www.ct.gov/husky by clicking on *For Providers* followed by *Benefit Grids* under the *Medical Management* sub-menu. For a definitive list of benefits and service limitations, CMAP providers may access the CMAP provider fee schedules and regulations at www.ctdssmap.com.

are based on (A) credible scientific evidence published in peer-reviewed medical literature that is generally recognized by the relevant medical community, (B) recommendations of a physician-specialty society, (C) the views of physicians practicing in relevant clinical areas, and (D) any other relevant factors; (2) clinically appropriate in terms of type, frequency, timing, site, extent and duration and considered effective for the individual's illness, injury or disease; (3) not primarily for the convenience of the individual, the individual's health care provider or other health care providers; (4) not more costly than an alternative service or sequence of services at least as likely to produce equivalent therapeutic or diagnostic results as to the diagnosis or treatment of the individual's illness, injury or disease; and (5) based on an assessment of the individual and his or her medical condition.

8. **Prior Authorization:** A process for approving covered services prior to the delivery of the service or initiation of the plan of care based on a determination by CHNCT as to whether the requested service is medically necessary.
