INTRODUCTION

Now that you have installed and become familiar with the functionality of the HP PROVIDER ELECTRONIC SOLUTIONS software, it’s time to begin claims data entry.

The claim entry screen consists of six sections: Three Headers, Two Service and Other Insurance screens. The following instructions detail requirements and general information for each of these sections.

In the following sections, each data entry field is defined with the appropriate requirements. Edits have been built into the software to assist you in correct data entry, however, READ THESE SECTIONS CAREFULLY. Payment or denial of your claims depends on the data you supply to HP.

Please reference your billing manual for detailed Connecticut Medical Assistance Program billing requirements unique to your provider type.
Provider Electronic Solutions contains reference lists of information that you commonly use when you enter and edit screens. For example, you can enter lists of common diagnosis codes, procedure codes, and modifiers. All of the lists are available from the data entry section as a drop-down list where you can select previously entered data to speed the data entry process and help ensure accuracy of the form.

There are several lists that you are required to complete prior to entering a transaction. Because this software uses the HIPAA compliant transaction format, there is certain information which is required for each transaction. To assist you in making sure that all required information is included and save time entering your information, some of the lists are required. These lists are:

- Client
- Billing Provider (and Other Provider, if applicable)
- Taxonomy
- Policy Holder

If these lists are not completed prior to keying your transaction, the list will open in the transaction form.

Some of the lists contain preloaded information that is available for auto-plugging as soon as you install Provider Electronic Solutions. Other lists require you to enter the information you will use for auto-plugging. You should enter your data in these lists soon after you set up Provider Electronic Solutions to take advantage of the auto-plug feature. To create or edit a list, select List from the Main Menu and then select the appropriate item.

**WORKING WITH LISTS**

From the Lists option on the menu bar, select the list you want to access.

Perform one of the following:

- To add a new entry, select Add.
- To edit an existing entry, select the entry and then enter your changes.
- The command buttons for Delete, Undo All, Find, Print, and Close work as titled.

Note: The Select Command button is not visible on the List window unless it has been invoked by double-clicking an autoplug field from a claim screen. Once a List entry has been either added or edited, the Select button must be clicked in order for the data to populate the claim screen with the selected List entry.
The Client list requires you to collect detailed information about your clients, which are then automatically entered into forms. All of the fields are required except Issue Date, Middle Initial and Subscriber Address Line 2.

CLIENT ENTRY INSTRUCTIONS

**CLAIM ENTRY INSTRUCTIONS**

Use the following instructions to complete the claim screens. When data entry is complete, click **SAVE**. The saved claim will appear in the list below the data entry screen. If the claim data hits edits, a message window will appear with error messages. Click **SELECT** to move to the highlighted error and correct the data. Once all error messages have been resolved, you can save the claim.

Newly saved claims are in Status R (Ready). Status R claims can be edited and saved multiple times prior to submission. Be sure to click **ADD** before beginning to enter the data for each new claim.

Note: The Select Command button is not visible on the List window unless it has been invoked by double-clicking an autoplug field from a claim screen. Once a List entry has been either added or edited, the Select button **must** be clicked in order for the data to populate the claim screen with the selected List entry.
